## Languages

English  
 Native or bilingual proficiency  
  
 Swedish  
 Elementary proficiency

With a background in Civil Engineering and experience in marketing, entrepreneurship and project management I am a problem solving developer who pays attention to detail and strives to continuously evolve as a professional.

Technologies: REACT, Javascript, HTML & CSS

## Personal Information

Being a curious individual and lifelong learner is what lead me to being a developer. I am happy to engage in the biggest and smallest of ideas and enjoy bringing them to life. if I am not coding I am sitting in the sun, talking to family in South Africa or plotting how to save the world.

## Education

2017 - 2019

### Water Resources Engineering (Masters of Science)

Lund University (Lund)

2013 - 2016

### Civil Engineering (Bachelors of Science)

University of the Witwatersrand (Johannesburg)

HTML Programming Language

Project Administrator

Oct 2022 - Nov 2022

### Frontend developer

#### 1337

together with colleagues, an Internal web app was created for employees of 1337 to update their knowledge activities when they are not actively working on client assignments. The app required that both managers and colleagues could follow what knowledge one is acquiring.

The initial version of the web app was created with in Enhance, a HTML-framework. This required a shift in mindset and active learning of a new framework. Alongside developing the project, we contributed to a technical write-up about exploring web-fundamentals

## Education
